Leopard kills bullock, panic grips farmers, villagers in Khanapur

PANIC has gripped farmers in Ghose village of Khanapur after leopard attacked and killed a bullock grazing in a farm near the forest on Friday evening. The animal belonged to Rajaram Patil, a farmer from Jatge village. According to reports, Patil had left his bullocks to graze in his field while he was engaged in farm work. The farm is located close to a forest area. Taking advantage of the situation, a leopard that had reportedly been lurking in the nearby forest suddenly attacked one of the bullocks and killed it. Upon receiving information about the incident, officials from the Forest Department rushed to the spot, conducted an inspection. Speaking about the incident, Londa Range Forest Officer Y.P. Tej confirmed that the animal was killed in a leopard attack.

He clarified that although some villagers initially suspected a tiger attack, a physical examination of the site and the carcass confirmed that the predator was a leopard. The forest officer appealed to farmers with agricultural lands near forest areas to remain vigilant, especially during the ongoing sowing and farming season. The loss of the bullock has dealt a financial blow to the farmer at a crucial time of agricultural activity. Local residents and farmers have urged the authorities to provide immediate compensation to Rajaram Patil for the loss suffered due to the wildlife attack.

Anti-SIR forum to launch state-wide rally

RAISING apprehensions that the Special Intensive Revision (SIR) would remove names of many backward classes, Dalits and Muslims, the Anti-SIR Committee formed to oppose SIR has said that they will launch a state-wide rally demanding some changes in SIR. Addressing media persons on Saturday, members of the committee said that for maintaining transparency in the SIR process, certain demands must be accepted by the election commission. Mentioning those demands, Yusuf Kanni, the prominent functionary said that the BCI must remove the 'logical discrepancy' option which he said is absurd and unworkable. With this option, the ECI can simply withhold enumeration of people on any minor issues such as misplacement of spelling. "This option was used even in West Bengal SIR where thousands of people

became ineligible to vote only because ECI withheld their names because they were minor mismatch in their names," he said. Mentioning the second demand, he said that the ECI must release names of all eligible and ineligible voters in digital format which will be easy to access the names. "We know that ECI has released non-readable data in computers and provided only hard copies. This will make scrutiny of names difficult," he said.

Cardiologist-turned-politician Dr C N Manjunath said while doctors form the "brains" of the medical profession, nurses represent its "heart". Speaking at the 19th Graduation Ceremony of the Cauvery Group of Institutions and St. Alphonsa College held at the KSOU Convocation Hall on Saturday, Manjunath noted that the medical field has changed dramatically over the past three decades.

# Chip woes stretch planning cycles: Ericsson India MD

GULVEEN AULAKH  
New Delhi, 14 June

**WE HAVE SEEN 5G SLINGING FOR MISSION CRITICAL SERVICES FOR PRIVATE NETWORKS. GOING FORWARD, WE WILL SEE EXAMPLES OF (ADOPTION IN) INDUSTRY AND ENTERPRISES AS WELL.**  
Nitin Bansal  
Managing Director, Ericsson India

Exponential increase in prices of components, primarily memory chips, and their limited production compared to demand, coupled with the supply chain constraints caused by the West Asian conflict is stretching planning cycles to as high as three to five years, compared to 18 to 36 months till some months back, said Nitin Bansal, managing director (MD) at Ericsson India. He underscored the need to maintain production timelines for providing telecom equipment to carriers.

"We need to forecast longer and create the demand and put the demand in the right time for the future, so that we are able to anticipate better and plan better to avoid any disruption. Now, we are looking at three to five years. Before, we used to look at, at least, one and a half years or 18 months to 36 months... to ensure just in time deliveries for our customers," he said.

Bansal, who is also the head of networks, Southern Asia, Oceania and India, told *Business Standard* that the cause of the change was more to do with supply of components affecting vertically across industries, rather than solely the West Asian conflict, which has disrupted supply chains for other sectors.

"We follow a very resilient supply chain, we have alternate suppliers, and we also work with better forecasts, but when it comes to concurrency, that is something that is a challenge at this point in time, no disruption, but definitely a challenge," Bansal said. However, production at the firm's India manufacturing unit has not been disrupted so far, he added.

Ericsson is among the oldest com-

panies to have set up a telecom equipment production base in the country, back in 1994. The Swedish telecom gear maker manufactures 5G radios, Radio Access Network compute, advanced passive antennas, and microwave products in partnership with global manufacturer Jabli Inc's facility in Pune.

The company — which has produc-

tion bases in China, Mexico and Romania — expanded the passive antenna production in India through partnership with Indian company YTON Technologies last year, which will also cater to export markets.

Ericsson, which also provides 5G slicing technology to global carriers, backed the need for Indian carriers to use the tech for monetisation opportunities after telcos spent billions into acquiring spectrum and building out the networks.

"We have been talking on the subject across all our customers. So, we say up to date to standards (5G). Two, we say go beyond 5G and differentiating connectivity, because we are the strongest from a technology and end-to-end delivery perspective, and differentiated connectivity services," Bansal said.

In India, Bharti Airtel is the first player to adopt 5G slicing on SA for postpaid customers, enabling creation of fast lanes for superior performance and delivery of services.

Globally, telcos have been using the technology at premium pricing. For instance, in Singapore, Singtel has partnered with Ericsson to offer higher speeds for customers attending sports events or concerts, for a subscription over and above a customer's monthly bill.

"When it comes to enterprises, we have seen 5G slicing for mission critical services for private networks. Going forward, we will see examples of (adoption in) industry and enterprises as well," the MD said.

He also highlighted the use of digital twins for network based on slicing and artificial intelligence (AI), for knowledge transfer between countries in an ongoing project between Volvo group's factory, and its research and development facilities in Bengaluru.

# Piramal Pharma to stay away from GLP-1 race amid global rush

SOHINI DAS  
Mumbai, 14 June

Piramal Pharma is staying away from the increasingly crowded generic GLP-1 peptide manufacturing market, despite the global rush into obesity drug supply chains. Instead, it is choosing to focus on niche, higher margin peptide opportunities as it prepares for a recovery. In its contract development and manufacturing (CDMO) business.

"We're not necessarily looking at the GLP-1s. We're looking at more niche peptides that have their own markets," Chairman Nandini Piramal told *Business Standard*.

The company is focusing on specialised, science-led peptide opportunities, rather than large-scale commodity manufacturing linked to blockbuster obesity drugs such as semaglutide and tirzepatide.

"We don't do the large-scale commodity opportunities. We're looking at more niche, science-led peptides," she said.

The comments come at a time when several global and Indian CDMO players are investing aggressively in peptide manufacturing capacity amid surging demand for obesity and diabetes drugs.

"We don't like very commoditised places because

## By the numbers

- 40% of CDMO revenue from differentiated offerings
- 155+ molecules under development
- 25 molecules in Phase-III
- 47% of CDMO revenue linked to innovation work
- 209 customer audits in FY26
- Zero OAI observations from 38 regulatory inspections
- 590 m being invested in Lexington and Riverview expansion

on-year (Y-o-Y), hurt by inventory destocking in a large on-patent commercial product and slower early-stage order inflows during the first half. Piramal, however, indicated that the destocking cycle that weighed on performance has now run its course. "It is behind us. It is complete," she said.

The company continues to target early-to-mid-term revenue growth and expects FY27 growth to be driven by new customer additions rather than a return of volumes from the large on-patent product.

"At this point, we are not counting on it," she said, referring to the lost business.

Instead, the company is banking on stronger order inflows, improving biotech funding and growing demand for differentiated manufacturing services to drive growth. Piramal's CDMO business derives around 40 per cent of revenue from differentiated offerings such as antibody-drug conjugates (ADC), high-potency active pharmaceutical ingredients, sterile injectables, peptides and on-patent manufacturing services.

It has also been seeing improved demand conditions following a recovery in global biotech funding. It has previously highlighted stronger request-for-proposal activity

and order inflows since the second half of FY26, supported by improved US biopharma funding and higher merger and acquisition activity in the sector. Management has guided for a return to early-to-mid-term revenue growth in FY27, with earnings expected to grow faster than revenue as operating leverage improves.

To support long-term growth, Piramal is investing around \$90 million to expand sterile injectable and payload-linker capacities at its Lexington and Riverview facilities, while continuing to build capabilities in high-value segments and specialised manufacturing services.

Piramal also underscored the company's focus on quality and regulatory compliance as a competitive differentiator in the global CDMO market. The company completed 38 regulatory inspections, including three US Food and Drug Administration inspections, and has received 100% compliance in its Official Action Indicated (OAI) observations, while customer audit rose to a record 209.

Piramal attributed the performance to a quality-first culture. "Quality is a culture," she said. "Companies get repeat OAI because they rush to do quick fixes without doing the culture transformation."

The case originated from a 2016 complaint, alleging that the company's market Becton Dickinson and Max Super Specialty Hospital, Patparganj, colluded to sell syringes carrying higher maximum retail prices through the hospital's in-house pharmacy.

The CCI, however, observed that patients are generally provided estimated treatment costs before admission, allowing them to compare overall treatment expenses before choosing a hospital.

# Maha FDA: Hospitals can't force patients to buy medicines from own pharmacies

SANKET KOUL  
New Delhi, 14 June

The Maharashtra Food and Drug Administration (FDA) has barred hospitals, medical practitioners and affiliated pharmacies across the state from compelling patients to purchase medicines exclusively from pharmacies located within or attached to hospital premises.

In an order dated June 12, FDA Commissioner Tukaram Mundhe directed hospitals and doctors to hand over prescriptions directly to patients or their relatives, and prohibited prescriptions from being routed to in-house or affiliated pharmacies without the patient's consent.

"Hospitals sometimes compel patients to purchase medicines only from pharmacies owned by or attached to the hospital, refuse to provide prescriptions, without prescriptions, or send prescriptions

directly to the hospital pharmacy without patient consent," the order stated.

Such practices deprive patients of the opportunity to purchase medicines from a pharmacy of their choice and undermine their consumer rights, it said. The FDA said withholding prescriptions or directing patients to specific pharmacies amounts to an unfair trade practice under the Consumer Protection Act, 2019.

Mundhe also directed doctors and hospitals not to refuse prescriptions and to inform patients that they are free to purchase medicines from any licensed pharmacy.

All hospitals have been asked to prominently display notices in Marathi and English stating: "Patients are not compelled to purchase medicines solely from the pharmacy located within this hospital. Patients or their relatives can

purchase medicines from any licensed pharmacy."

The order warned that any regulatory legal action could be initiated against institutions found violating the directive.

Mundhe has directed divisional joint commissioners, assistant commissioners and drug inspectors across the state to communicate the order to hospitals and practitioners within their jurisdictions, and verify compliance during routine inspections.

The Maharashtra FDA's directive comes weeks after the Competition Commission of India (CCI) declined to fully-enforce findings by its state-wide probe involving 12 Delhi-based private hospitals accused of forcing patients to use in-house pharmacy facilities.

The Commission had held that super-specialty hospitals do not automatically consti-

tute separate monopoly "aftermarkets" for admitted patients, merely because patients are locked into hospital pharmacies, diagnostics and consumables after admission.

At the same time, the CCI acknowledged that hospitals can create significant practical lock-in effects that leave admitted patients heavily dependent on internal facilities for medicines, tests and related services.

The case originated from a 2016 complaint, alleging that the company market Becton Dickinson and Max Super Specialty Hospital, Patparganj, colluded to sell syringes carrying higher maximum retail prices through the hospital's in-house pharmacy.

The CCI, however, observed that patients are generally provided estimated treatment costs before admission, allowing them to compare overall treatment expenses before choosing a hospital.

# FSSAI issues notices to 8 food companies for 'misleading' healthy claims on packaging

PRESS TRUST OF INDIA  
New Delhi, 14 June

The Food Safety and Standards Authority of India (FSSAI) on Sunday issued notices to eight food business operators for allegedly using misleading brand names, trade names and product claims in violation of the Food Safety and Standards Act, 2006.

The companies served notices include Emami Healthy & Tasty, Healthy Aid, Trovy, The Healthy Factory, Healthy Choice, Plan B and Neuherts. The regulator announced the notices through its social media handles.

## THE COMPANIES THAT WERE SERVED NOTICES INCLUDED EMAMI HEALTHY & TASTY, HEALTHY AID, THE HEALTHY FACTORY, AND PLAN B

Among the prominent names flagged is Emami Healthy & Tasty, the cooking oils arm of the Kolkata-based Emami Group. FSSAI said its trade name is "likely to mislead consumers and appears to be in contravention of applicable FSSAI regulations". Plan B, which markets its products as

"plant based vegan", has drawn the regulator's attention for creating the impression that its products are vegan — without obtaining prior approval for vegan food endorsement.

The Healthy Factory's "Zero Maida Whole Wheat Bread" — which contains chukki fresh atta and wheat gluten — has been flagged for misleading consumers. Its "Zero maida pizza" product faces similar scrutiny, with FSSAI noting the claim appears to violate applicable regulations.

Neuherts' product line "Tri-Vitamin" has been cited for

using a trade name that is "neither defined nor recognised" under FSSAI regulations, making it potentially misleading.

Trovy's range of snack products, including "Healthy Mix Veggie Chips", "Healthy Ragi Chips" and "Healthy Moong Dal Chips", have been flagged for making misleading "healthy" claims despite containing a range of other ingredients. FSSAI also flagged Healthy Master's tagline, "Vision to serve healthy", Healthy Choice's "Healthy food for Healthy life Pola", and Health Aid's brand name as likely to mislead consumers.

# मजबूत वृद्धि से टॉरेंट फार्मा को फायदा

राम प्रसाद साहू  
मुंबई, 14 जून

भा...त से होने वाली कमाई के दम पर वित्त वर्ष 2026 की चौथी तिमाही में अच्छी वृद्धि के कारण प्रोक्रोजेज फर्मे टॉरेंट फार्मा को इस क्षेत्र में सबसे अच्छे परदेम मान रही है। शेयर के बेहतर प्रदर्शन ने सकारात्मक माहौल बनाने में मदद की है।

निपटी फार्मा और उन कंपनियों के मामले में प्रोक्रोजेज फर्मे बाजार पूंजीकरण के हिसाब से तीसरी सबसे बड़ी फार्मा कंपनी को लेकर सकारात्मक है। इस शेयर ने पिछले वर्ष 44 फीसदी का टिपटिन दिया है। इसकी तुलना में, इसी दौरान निपटी फार्मा ने 12 प्रतिशत का टिपटिन दिया है। हालांकि वित्त वर्ष 2026 की चौथी तिमाही के नतीजे और भी चले। निपटी इसके लिए पूर्व असाइड डायलेंस वाले कारण हैं, लेकिन मुख्य शेरी और भौगोलिक इलाकों में अच्छी वृद्धि की उम्मीद से शेयर की कीमत को सकारात्मक दिशा में बढ़ाया है।

भारतीय बाजार में दो अंकों की वृद्धि से भारतीय फार्मा कंपनियों के कुछ राजस्व पर दबाव कम करने में मदद मिली, जबकि अमेरिकी बाजार में कीमती के दबाव का असर विक्री पर पड़ा। मार्च तिमाही में, पिछले साल की इसी तिमाही के मुकाबले अमेरिकी राजस्व में तो

# एआई दांव में सुस्ती के लक्षण: इलारा

सुचर सेतुरामन  
मुंबई, 14 जून

इलारा कैपिटल की एक रिपोर्ट में कहा गया है कि मई 2025 में शुरू हुई तेजी के बाद पहली बार वैश्विक एआई की निवेश धीम में सुस्ती के संकेत दिख रहे हैं। निवेशक एआई में जुड़े इन्फ्रास्ट्रक्चर और आर्गैनिंग ब्रूथला क्षेत्र में अपना निवेश घटा रहे हैं। रिपोर्ट में यह भी कहा गया है कि इसके बावजूद वे इस टेक्नॉलॉजी से संबंधित फंड उठाने वाली कंपनियों में निवेश जारी रखे हुए हैं।

प्रोक्रोजेज के नए 'ग्लोबल लिक्विडिटी ट्रेकर' में बताया गया है कि 'ग्लोबल इमर्जिंग मार्केट (जीईएम)' फंड जो ताइवान और दक्षिण कोरिया जैसे बाजारों के जरिये एआई धीम में निवेश करने वालों के लिए पर्याप्त दरता बना रहे हैं, उनसे लगातार कुछ इन्फंड में 10 अरब डॉलर की निकारी हुई है।

क्यापिटल इन्वेस्टि फंडो और सीमाती मालुओ फंडो में भी बड़ी मात्रा में पैसा बाजार निकला है। इलारा ने कहा, 'कुछ मिलाकर, वे रुझान बताते हैं कि एआई इन्फ्रास्ट्रक्चर और क्रोमिक थैरेपी इकोसिस्टम में बढ़े पैमाने पर टॉप-डाउन निवेश

ग्लोबल इमर्जिंग मार्केट (जीईएम) फंडों से लगातार छह इन्फंडों में 10 अरब डॉलर की निकारी हुई है

एक साल से ज्यादा समय में पहली बार चमक खड़ा है। हालांकि, रिपोर्ट में इस बात पर जोर दिया गया कि एआई से मुख्य रूप से फायदा उठाने वाली कंपनियों में निवेशकों का भरोसा बना हुआ है।

हाल की रिपोर्ट के दौरान अमेरिकी टेक्नॉलॉजी-फोकस्ड फंडों में रिटर्न 9 अरब डॉलर का निवेश आया, जबकि अमेरिकी इन्वेस्टोर्स में विदेशी निवेश लगातार 11वें सप्ताह सकारात्मक रहा और 10 अरब डॉलर के पांच महीने के उच्चतम स्तर पर पहुंच गया। भारत के लिए एआई-आधारित वैश्विक पूंजी रोडमैन सुनीती बना हुआ है। चीन के साथ-साथ भारत भी उन निवेशकों के लिए फंडों का असर स्रोत बनकर उभरा है जो विदेश में एआई से जुड़े मौकों में फंडा लगा रहे हैं। रिपोर्ट का अनुमान है कि हाल के सप्ताह में भारत केंद्रित फंडों से 77 करोड़ डॉलर की निकारी हुई, जिसमें फोकस्ड फंडों से 46 करोड़ डॉलर की निकारी शामिल है। इलारा के अनुसार जीईएम फंडों के मुकाबले भारत का प्रत्येक एक साल और तीन साल, दोनों ही समय-सीमाओं में रिटर्न में वृद्धि स्तर पर आया है। प्रोक्रोजेज ने इस स्थान के लिए काफी बढ़त तक जून 2025 से इन्फंडों में तेजी से जुड़े मौकों में वैश्विक पूंजी के निवेश को विमोचन बताया है। रिपोर्ट में कहा गया है, 'जून 2025 से सख्त प्रदर्शन का समय बंदे की मुख्य वजह एआई से जुड़े मौकों को और वैश्विक पूंजी का रुकावट

# रायल्टी दर में बदलाव ओएनजीसी और ओआईएल के लिए नहीं अच्छा

देवायु दास  
मुंबई, 14 जून

तेल एवं गैस रायल्टी घटाने के बाद उसकी दर दोबारा बढ़ाए जाने से ऑयल इंडिया (ओआईएल) और तेल एवं प्राकृतिक गैस निगम (ओएनजीसी) के एक्टिवा और इंपीएस (प्रति शेयर कमाई) पर असर पड़ सकता है। तेल कंपनियों कच्चा तेल और प्राकृतिक गैस निकालने पर सरकार को रायल्टी देनी है। मई में, रायल्टी को तर्कसंगत बनाने के बाद सरकार ने कुछ फायदों को आंशिक रूप से वापस ले लिया था। अनोखर नॉमिनेशन ब्लॉक और नई खोज लाइसेंसिंग नीति (एनएलपी) से पहले के ब्लॉक के लिए रायल्टी दरें 16.67 प्रतिशत एक्स रायल्टी से बदलकर 12.5 प्रतिशत कर दी गई थीं। लेकिन इस महीने की शुरुआत में सरकार ने दरों को फिर से 20 प्रतिशत रायल्टी कर दिया। या 16.67 प्रतिशत बिना रायल्टी कर दिया।

रायल्टी की गणना के लिए तय बंद की गई कम कीमत का एक नतीजा सरकार को भी देने खला राजस्व कुकसमान होता। इस कारण भी इस फेराले को वापस लिया हो सकता है ताकि लॉबींग में हो। अगस्त की कंपनियों को कच्चे तेल और प्राकृतिक गैस के लिए निष्कात ब्लॉक पर 20 प्रतिशत और दूसरे ब्लॉक पर 15 प्रतिशत की मानक एन-वैलोरन कटौती का फायदा मिलेगा।

ऑयल इंडिया पर ज्यादा असर पड़ेगा क्योंकि इसका उत्पादन जमीन तेल पर (ऑनशोर) होता है। विस्कोकों का अनुमान है कि वित्त वर्ष 2027 में कच्चे तेल की विक्री पर प्रभावी रायल्टी दर 10 डॉलर प्रति बैरल से बढ़कर 13 डॉलर प्रति बैरल हो जाएगी, जिससे ऑयल इंडिया का मुफ़ादा का 4-5 प्रतिशत और इंपीएस 5-6 प्रतिशत घट जाएगा। इस बीच, हाइड्रोकार्बन अन्वेषण और लाइसेंसिंग नीति (एनएलपी) के तहत बनाई गई नई कैटेगरी के फोर्ड आभी भी हैं। इनके लिए

मई में तेल एवं गैस क्षेत्र में रायल्टी की दरें बढ़ते जाने के बाद एक सरकारी ने कुछ फायदों को आंशिक रूप से वापस ले लिया था

2019 के बाद बांग्लादेश नई और उन्हें आर्बिट किया गया था। वित्त पॉलिसी से पांच साल के अंदर उत्पादन शुरू हो सकता है, उन्हें पहले साल तक कोई रायल्टी नहीं देनी। इसके बाद, आठवें साल से गैर गैरानी और वेबद नएर पानी वाले फोर्ड के लिए (बैरिन की कैटेगरी के आधार पर) क्रमशः 3.5-4.5 प्रतिशत या 1-2 प्रतिशत रायल्टी देनी होती है। इससे तेजी से अन्वेषण और निवेश को बढ़ावा मिलता है। इस फेराले को वापस लेने का ओएनजीसी पर कम असर पड़ेगा, क्योंकि उसने कच्चे तेल का 30 प्रतिशत उत्पादन जमीन पर (ऑनशोर) होता है और वह नए कुओं से मिलने वाली गैस (एनएलपी) के ज्यादा इस्तेमाल पर स्थान दे रही है। ओएनजीसी के लिए कच्चे तेल की विक्री पर सगरेर वाली प्रभावी रायल्टी 7.7 डॉलर बैरल से बढ़कर 8.6 डॉलर बैरल हो जाएगी। इससे ओएनजीसी के स्टॉकओवर एक्टिवा पर 1 फीसदी और इंपीएस पर 1.4 फीसदी का असर पड़ेगा।

संसार में रिफार्मिंग पर विंडोबॉल टैक्स भी लागू था। लेकिन इसका असर अल्पदूरी पर नहीं पड़ता है। ज्यादातर विस्कोकों को नई लागत की हूट पर दोबारा विंडोबॉल टैक्स लगाया जाता। मौजूद सुधारों पर ऑयल इंडिया का आर्थिक नहीं लगती है, क्योंकि यह चौथी तिमाही के अनुमान पूरे नहीं कर पाए। पू-जननीयक उन्मूल-पुनर के बीच विस्कोकों की निरती-जुती अर्थव्यवस्था देखने को मिली। एक तरफ, भारत के अर्थव्यवस्था कुलों को सालाना 10 अरब डॉलर का निवेश मिल रहा है, साथ ही प्राकृतिक गैस को नई खोजें हो रही हैं और रायल्टी में कमी आई है। विस्कोकों टैक्स में शीत एक सरकारी सकारात्मक और इससे मुलाकात बनाने चाहिए। ऑयल इंडिया के पास में तर्क यह है कि जल्द ही इसके उत्पादन में बढ़ोतरी की उम्मीद है, लेकिन ओएनजीसी का रिस्चर्च एक्टिविटी रेपोर्ट बेहतर है, उसे प्राकृतिक गैस की विक्री से ज्यादा कीमत मिलती है और वह अपने रिस्चर्च को तेजी से विक्री करती है।

## बाजार हलचल

### रेफरल प्रोग्राम फिर से शुरू

स्टॉक प्रोकर जॉयोषा ने अपना रेफरल प्रोग्राम फिर शुरू कर दिया है। नियामकीय अनिश्चितता के कारण कुछ समय के लिए रोक गए प्रोक्रोजेज-सेयरिग इंडेस्ट्री को अब वापस लाया गया है। यह रेफरल प्रोग्राम नियामकीय प्राविधिकों के कारण 2024 में रोक दिया गया था। कपी इसकी स्टॉकप्रोकर के नए अकाउंट खुलने में आधी हिस्सेदारी होती थी। हालांकि जॉयोषा ने मार्केट और विज्ञान पर खर्च करने से परहेज किया है, लेकिन रेफरल प्रोग्राम ने 'वर्ड-ऑफ-माउथ' प्रोग्राम को तैयार पर मदद की है। पिछले एक साल में बाजार भागीदारी इसके अलावा, जब तक दोनों पक्षों के बीच कोई औपचारिक समझौता नहीं होता, तब तक विशेषी ऑपेकॉलियो निवेशकों को बाजारों की संभावना कम है। एक्सआई विस्कोकोटॉज में टेक्नोलॉजी और डेवेलपमेंट रिस्चर्च के प्रमुख सुदीप शाह ने कहा, 'इंडेक्स 23,800 और उसके बाद मनोवैश्विक स्तर 24,300 की ओर बढ़ता जारी रख सकता है। नीचे 23,350-23,300 का दायरा अलग सपोर्ट एरिया के तौर पर काम कर सकता है।' सुखरु तिमाही और सुदूर सेतुरामन

निपटी को 23,350-23,300 पर अहम समर्थन अमेरिका-ईएन जुड़े के स्मॉल कैप की नई उम्मीदों के बीच निपटी पिछले सप्ताह 1.1 फीसदी की बढ़त के साथ बढ़ हुआ और उसने लगातार दो सप्ताह की रिपेटिट का सिलसिला तोड़ा। शुक्रवार को कच्चे तेल की कीमतों में भी गिरावट आई और यह 90 डॉलर से नीचे आ गया। नतीजतन, सूचकांक सप्ताह के अंत में 1.10 प्रतिशत ऊपर बढ़े हुए। लेकिन निवेशक अभी भी सावधानी बतार रहे हैं, क्योंकि यू.एस. के निवेशकों को लेकर वृद्धि की उम्मीदें अभी भी लौकिक बतार में हैं। निवेशकों में बढ़ती प्राविधिकों के कारण 2024 में रोक दिया गया था। कपी इसकी स्टॉकप्रोकर के नए अकाउंट खुलने में आधी हिस्सेदारी होती थी। हालांकि जॉयोषा ने मार्केट और विज्ञान पर खर्च करने से परहेज किया है, लेकिन रेफरल प्रोग्राम ने 'वर्ड-ऑफ-माउथ' प्रोग्राम को तैयार पर मदद की है। पिछले एक साल में बाजार भागीदारी इसके अलावा, जब तक दोनों पक्षों के बीच कोई औपचारिक समझौता नहीं होता, तब तक विशेषी ऑपेकॉलियो निवेशकों को बाजारों की संभावना कम है। एक्सआई विस्कोकोटॉज में टेक्नोलॉजी और डेवेलपमेंट रिस्चर्च के प्रमुख सुदीप शाह ने कहा, 'इंडेक्स 23,800 और उसके बाद मनोवैश्विक स्तर 24,300 की ओर बढ़ता जारी रख सकता है। नीचे 23,350-23,300 का दायरा अलग सपोर्ट एरिया के तौर पर काम कर सकता है।' सुखरु तिमाही और सुदूर सेतुरामन
